50's

ANNI 50

Danilo Pifferi, addetto agli smalti in una delle principali industrie ceramiche di Sassuolo, ha una prima intuizione: raccogliere gli smalti si scarto, mescolarli a bottiglie rotte e limatura di ferro, per ottenere risultati nuovi. È il primo al mondo a realizzare un vero e proprio "riciclaggio" quando ancora nessuno ne capisce l'importanza. Sono suoi gli smalti dei 120 mila metri quadri di piastrelle che nel **1959** pavimentarono l'intero villaggio olimpico di Roma per le olimpiadi del **1960**.

60's

ANNI 60

Danilo Pifferi si dedica ad un'incessante attività di ricerca che lo porta a trovare per primo la formula ideale per lo screziato, il craquelé, formula che ne consente la produzione a costi molto più contenuti. Decide di diventare imprenditore di se stesso e comincia a produrre con la sua formula gres smaltato che ha subito un grande successo. Nel **1964** fonda a Fiorano la Ceramica Artistica Artigiana. Il craquelé diventa una moda.

70's 80's 90's

ANNI 70/80/90

Passano le mode, ma non passa la passione della famiglia Pifferi per la costante ricerca di soluzioni che offrano la migliore qualità al giusto prezzo. La Ceramica Artistica Artigiana continua a crescere ed a offrire al mercato novità e un servizio clienti inimitabile, senza dimenticare l'ispirazione delle prime ore, e quindi continuando ad investire nelle tecniche di riciclaggio, in anticipo su tutte le altre aziende. Intanto il figlio William ha affiancato il padre nella guida della società e nel **1995** decidono di realizzare uno stabilimento da 4 milioni di metri quadri di ceramica all'anno, a Pigneto (MO).

OGGI

William Pifferi e il figlio David continuano la strada aperta dal fondatore: la scelta delle migliori materie prime, la cottura a 1225°, e l'intero controllo del ciclo produttivo assicurano infatti al gres fine porcellanato smaltato realizzato nelle linee produttive della Ceramica Artistica Due caratteristiche tecniche ed estetiche di assoluto rilievo. L'azienda continua ad essere all'avanguardia anche nella capacità di ridurre l'impatto ambientale della propria attività, attivando tutte le politiche di riciclo utili a raggiungere questo obiettivo.

Rigore e ricerca, serietà, servizio e disponibilità sono valori che rimangono fondanti di tutta l'attività dell'azienda e che ne continuano a decretare il successo in Italia e nel mondo.

The Fifties

Danilo Pifferi, in charge of glazes in one of the leading ceramic factories in Sassuolo, has a first intuition: collecting waste glazes, mixing them with broken bottles and iron filings, to achieve new results. He is the first one in the world to carry out a veritable "recycling" process when nobody understands its importance yet. He makes the glazes for 120,000 square metres of tiles covering the floorings of the whole Olympic village in Rome on the occasion of the Olympic Games held in 1960.

The Sixties

Danilo Pifferi devotes himself to a relentless research activity which allows him to be the first one to find the ideal formula for producing 'craquelé' (streaked) tiles at significantly lower costs. He decides to set up his own business and starts to produce glazed stoneware using his formula, which immediately meets with a great success. In 1964 he establishes Ceramica Artistica Artigiana in Fiorano. The craquelé effect comes into fashion.

The 70s, 80s and 90s

Fads may come and go, but Pifferi family's commitment to an ongoing search for solutions offering the best quality at a suitable price remains unchanged. Ceramica Artistica Artigiana continues to grow placing new products on the market and offering unparalleled customer service, without forgetting the inspiration of the early times. Therefore, it keeps investing in recycling techniques, ahead of all other companies. In the meanwhile, William starts to assist his father in managing the company and in 1995 they decide to establish a plant producing 4 million square metre of ceramic tiles per year, in Pigneto (Modena).

Today

Today William Pifferi and his son David continue to follow the path opened by the founder: the selection of the best raw materials, firing at 1,225°C, and the overall control on the production cycle provide glazed fine porcelain stoneware produced by Ceramica Artistica Due with outstanding technical and aesthetic features. The company also boasts an outstanding capacity to lower the environmental impact of its activities, as it implements all recycling strategies required to achieve this goal. Rigour and research, reliability, customer support and readiness to help are the core values of the company which continue to make it successful both in Italy and all over the world.

50er Jahre

Danilo Pifferi, Glasierer in einem der wichtigsten keramischen Industriebetriebe in Sassuolo, hat eine erste Idee: nämlich Glasurreste mit Flaschenscherven und Eisenspan zu vermengen, um damit neue Ergebnisse zu erzielen. Er war weltweit der Erste, der ein echtes Recycling durchführte, dessen Bedeutung damals noch niemand erkannte. Die Glasuren der 120.000 m² Fliesen, mit denen 1959 das gesamte olympische Dorf in Rom in Vorbereitung für die olympischen Spiele 1960 ausgestattet wurde, stammen von ihm.

60er Jahre

Danilo Pifferi widmet sich einer unermüdlichen Forschungsarbeit, bei der er als Erster eine ideale Formel für die Herstellung krakelierter Glasuren findet, durch die sich die Produktionskosten deutlich senken ließen. Er beschließt, selbst Unternehmer zu werden und beginnt mit großem Erfolg, glasiertes Feinsteinzeug mit seiner Formel zu erzeugen. Im Jahr 1964 wird in Fiorano das Unternehmen Ceramica Artistica Artigiana gegründet. Die Craquelé-Glasur wird Mode.

70er, 80er und 90er Jahre

Mode kam und verging, was aber nicht verging, war die Leidenschaft der Familie Pifferi, mit der weiterhin nach Lösungen geforscht wird, um beste Qualität zu vernünftigen Preisen anbieten zu können. Ceramica Artistica Artigiana wächst ständig und bietet dem Markt laufend Neuheiten und einen unvergleichlichen Kundenservice, ohne dabei die Inspiration der ersten Stunde zu vergessen, nämlich in Recyclingtechniken zu investieren, noch bevor alle anderen Unternehmen dies tun. Sohn William unterstützt mittlerweile seinen Vater bei der Unternehmensleitung und 1995 beschließt man, in Pigneto bei Modena ein Werk zu errichten, in dem jährlich 4 Millionen m² Fliesen erzeugt werden.

Heute

Heute gehen William Pifferi und sein Sohn David auf dem vom Gründer eingeschlagenen Weg weiter. Die Wahl der besten Rohstoffe, das Brennen bei 1225 °C und die vollständige Kontrolle des Herstellungsverfahrens garantieren, dass das glasierte Feinsteinzeug, das in den Produktionsanlagen von Ceramica Artistica Due erzeugt wird, hervorragende technische und ästhetische Eigenschaften aufweist. Das Unternehmen ist immer einen Schritt voraus, auch wenn es darum geht, die Auswirkungen der Produktion auf die Umwelt zu reduzieren. Hier ist man bemüht, sämtliche Recyclingmethoden einzusetzen, um dieses Ziel zu erreichen. Präzision und Forschung, Service und Verfügbarkeit sind die Werte, die allen Aktivitäten des Unternehmens zugrunde liegen und auf die der Erfolg in Italien und in der Welt zurückzuführen ist.

Années 50

Danilo Pifferi, préposé aux émaux dans l'une des principales industries céramiques de Sassuolo, a une première intuition : collecter les émaux de rebut, les mélanger avec des bouteilles cassées et de la limaille de fer afin d'obtenir des nouveaux résultats. Il est le premier au monde à effectuer un véritable « recyclage » lorsqu'encore personne n'en comprenait l'importance. Parmi ses créations, les émaux des 120 mille mètres carrés de carrelage qui, en 1959, ont décoré tout le village olympique de Rome pour les Jeux Olympiques de 1960.

Années 60

Danilo Pifferi se consacre aux recherches sans cesse, ce qui l'amène à découvrir pour la première fois la formule idéale pour le craquelé qui peut, dorénavant, être produit à un coût beaucoup plus bas. Il décide de devenir entrepreneur de soi-même et commence à produire, suivant sa formule, le grès émaillé qui rencontre immédiatement un succès remarquable. En 1964 il fonde à Fiorano la Ceramica Artistica Artigiana. Le craquelé devient une mode.

Années 70, 80, 90

Les modes passent, mais la passion de la famille Pifferi pour la recherche constante de solutions offrant la meilleure qualité au juste prix reste. Ceramica Artistica Artigiana continue son évolution en offrant sur le marché des nouveautés et un service client extraordinaires, sans jamais perdre de vue l'inspiration du début, et en continuant à investir à l'avance dans les techniques de recyclage par rapport aux autres entreprises. Pendant ce temps, William rejoint son père à la direction de la société et, en 1995, ils décident de bâtir un établissement à Pigneto (MO) produisant 4 millions de mètres carrés de carrelage par an.

Aujourd'hui

Actuellement William Pifferi et son fils David continuent à parcourir le chemin tracé par le fondateur : le choix des meilleures matières premières, la cuisson à une température de 1225° et le monitoring complet du cycle de production confèrent au grès cérame fin émaillé obtenu dans les lignes de production de Ceramica Artistica Due des caractéristiques techniques et esthétiques d'extrême importance. L'entreprise continue aussi à être à l'avant-garde en limitant l'impact de son activité sur l'environnement et en adoptant toutes les politiques de recyclage nécessaires pour atteindre ce but. Rigueur et recherche, sérieux, service et disponibilité sont les valeurs à la base de l'activité de cette entreprise grâce auxquelles elle peut remporter ses succès en Italie et à l'étranger.

L'AZIENDA

COMPANY | L'ENTREPRISE | DAS UNTERNEHMEN

I nostri prodotti si contraddistinguono per una grande attenzione sia alla qualità del prodotto sia alla sua estetica. Per la loro realizzazione viene utilizzato un sistema di smaltatura digitale all'avanguardia, ad alta definizione con 360x600 dpi di risoluzione, per una visione naturale grazie alla combinazione in stampa di 6 colori con 1025 ugelli per colore. Una tecnologia che consente la più ampia libertà di espressione nel design ceramico, con un livello di perfezione e di naturalezza capace di stupire ed appassionare per lo stupefacente rendimento di colori, trame e decorazioni.

Our range distinguishes itself for the particular attention that we bring to the quality and the aestheticism of our products. This has been realized using a high definition cutting-edge digital glazing system with a 360x600 dpi resolution, offering a natural vision by combining 6 colours in the printing phase with 1,025 nozzles per colour. This technology provides the maximum creative freedom to ceramics design. Its perfection level and naturalness is amazing, with stunning results in terms of colours, textures and decors.

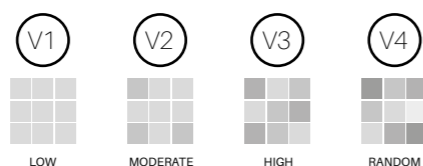

Nos produits se distinguent grace à l'attention particuliere que nous apportons à la qualité et l'esthetisme de nos produits. Ceux ci ont été réalisé en utilisant un système de vitrage numérique de pointe en haute définition avec une résolution 360x600 dpi, offrant une vision naturelle en combinant 6 couleurs dans la phase d'impression avec 1025 buses par couleur. Cette technologie offre une liberté de création maximale à la conception de la céramique. Son niveau de perfection et l'aspect naturelle est incroyable, avec des résultats étonnants en termes de couleurs, de textures et de décors

Unsere Produkte zeichnen sich durch ihre hohe Qualität und Schönheit aus. Für ihre Herstellung wird ein modernes, hoch auflösendes digitales Glasursystem mit 360x600 dpi eingesetzt, das in Kombination mit einem 6-Farben-Druck mit 1025 Düsen pro Farbe zu einem optisch natürlichen Ergebnis führt. Diese Technologie bietet hinsichtlich des Keramikdesigns eine enorme Gestaltungsfreiheit und führt mit einer überwältigenden Fülle von Farben, Mustern und Dekors durch Perfektion und Natürlichkeit zu einer unglaublichen Wirkung.
